Front-end developer shipping production Next.js, React and TypeScript products on Laravel, Node.js and Supabase backends: more than 30 since late 2025, including e-commerce storefronts, admin and finance dashboards, booking and ticketing sites and marketing sites. Before that, four years of commercial Flutter UI work on iOS and Android. I read, trace and test each change before it ships.

Core Competencies

- **Front-end:** Next.js (App Router, server and client components), React, TypeScript, Tailwind CSS, Framer Motion, GSAP; responsive and accessible UI, design-system components, forms and validation, data tables and charts (Recharts).
- **UI engineering:** turning Figma and client briefs into distinctive, production-grade interfaces; dark mode and theming; loading, empty and error states.
- **Backend & data:** Laravel, Node.js, Supabase (Postgres, row-level security, auth, storage), PostgreSQL, API routes and webhooks, Paystack payments, Resend email, role-based access in dashboards.
- **Delivery:** Git with reviewed pull requests, Vercel and Cloudflare Workers deploys, production debugging, direct work with clients from brief to launch.
- **Mobile:** Flutter and Dart (advanced), Riverpod, Clean Architecture; App Store and Google Play releases.

Web Products Shipped (live)

- **Evvy Hairs** (e-commerce, evvyhairs.com): Next.js storefront plus a separate admin app on Supabase. Product catalogue, cart and Paystack checkout, customer-chosen installment plans, affiliate tracking with commissions and payouts, transactional email.
- **VotixCare** (healthcare, votixcare.com): marketing site plus clinic, patient, pharmacy and admin dashboards in Next.js on Supabase: appointments, payments, reconciliation, timezone-correct reporting and charts.
- **Beepex** (fintech, beepexapp.com, admin.beepexapp.com): editorial landing page with scroll-driven sections, and the operations admin dashboard for the Beepex app: users, transactions, gift-card redemptions and rates, commissions, support inbox and transaction charts.
- **Chiefs House** (chiefshouse.com): public site and admin in Next.js on Supabase, Paystack ticket payments with webhook verification, scheduled jobs; migrated from Vercel to Cloudflare Workers.
- **Forza Projects** (forzaprojects.com): company website plus an internal operations dashboard with department-scoped access, invoices and payment receipts.
- **ICOWEB** (icowebagency.com): agency site, an admin for quotations, bookings and leads, and a separate invoicing app, on Next.js and Supabase.
- **Client sites:** RIVCHPP (rivchpp.icowebagency.com, full redesign with a theme switcher), HD Attitude Studios (photography portfolio with WhatsApp booking), Generations Specialist Hospital, Julirose Hotels and an Abia State Government portal.

Professional Experience

- | | |
|--|---|
| <ul style="list-style-type: none">○ ICOWEB Agency
<i>Founder, Web & Mobile Engineer</i><ul style="list-style-type: none">- Design and engineering studio. I build the client web products listed above, from brief and design through deploy and ongoing changes.- Mobile work for the same clients: Communittee Golf (live on the App Store, real-time chat on the Stream Chat SDK), the VotixCare Flutter patient app, BGlory Rides rider and driver apps. | Port Harcourt
<i>2022–Present</i> |
|--|---|

- **Beepex** **Remote**
Flutter Developer (Freelance) *2025–Aug 2026*
 - Built the Beepex fintech app (wallet, airtime, data, electricity and TV bills, gift-card redemption, OTP-secured authentication), plus the web products listed above. Handed over to the client in August 2026.
- **Elli App** **Remote, Germany**
Senior Flutter Developer *May 2024–Present*
 - Multi-language (English, Croatian, Serbian, Dutch) educational app for children with Down syndrome; accessible, responsive UI and gamification delivered from design input.
- **QHarbor Research** **Remote, Netherlands**
Flutter Developer & Library Engineer *Sep 2024–Jan 2026*
 - Contributed to Numd, an open-source NumPy-style numerical computing library for Dart: int64 and complex128 support, type promotion, HDF5 integration, tests and documentation.
- **LYQX Agency** **Remote, Ukraine**
Mobile Technical Lead *Aug 2024–Sep 2025*
 - Delivered production apps for international clients; set architecture patterns, coding standards and CI/CD; ran code reviews and mentored mid-level and junior developers.
- **Talosmart, iMotion Hub, Ordibillz** **Nigeria**
Flutter Developer *2022–2024*
 - Built responsive app interfaces, integrated REST APIs and took part in code reviews; at iMotion Hub, led delivery of a Google Play service marketplace with secure payments and analytics.

Education

- **Ambrose Alli University** **Benin City**
Bachelor of Education in Mathematics *2014–2019*
- **Udemy** *2021*
App Brewery Flutter Bootcamp (Angela Yu)
Dart, mobile architecture, software engineering practice.

Languages

- English (professional working proficiency). Yoruba (native).
